

# Making the Emerald City

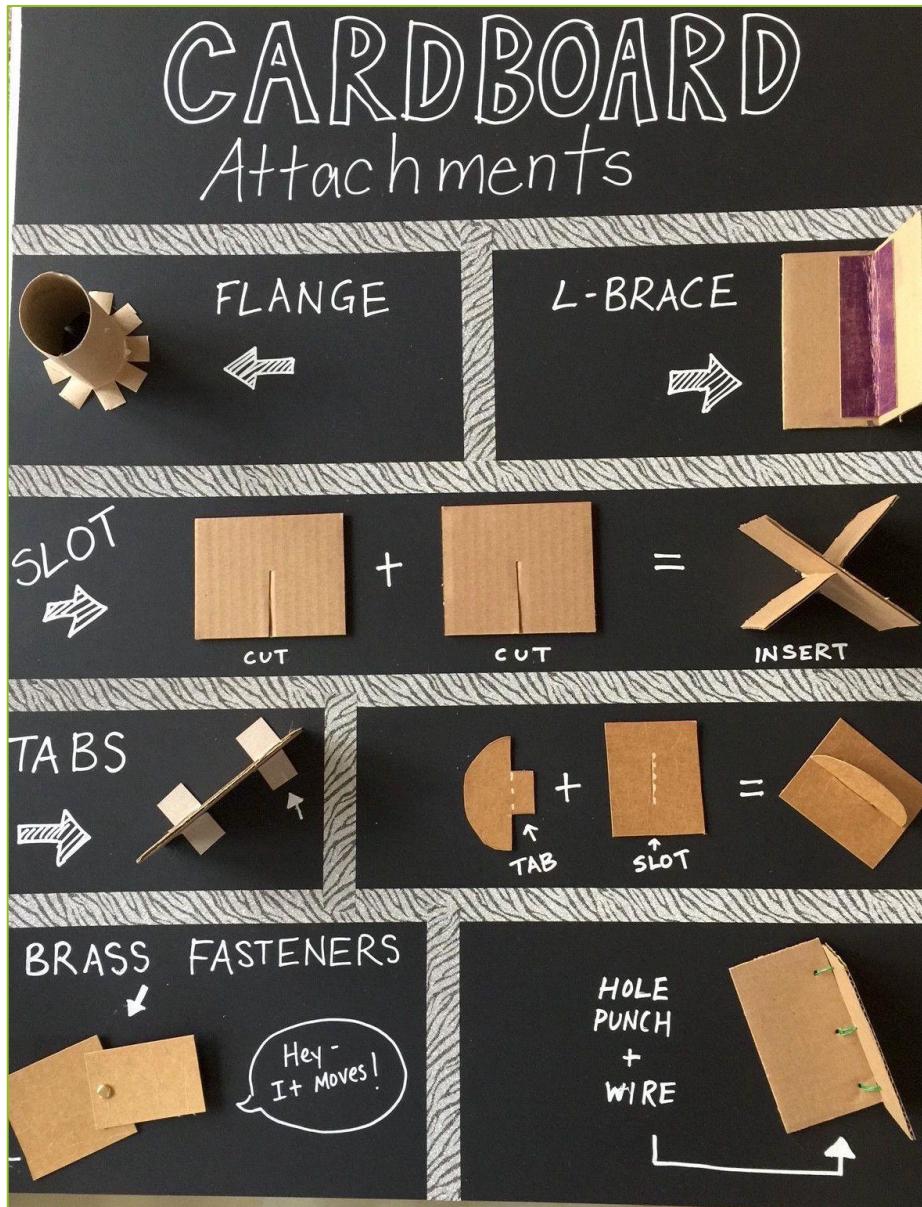

Demonstrate a range of joining techniques (such as gluing, hinges or combining materials to strengthen)

- Cut materials safely using tools provided.

- Demonstrate a range of cutting and shaping techniques (such as tearing, cutting, folding and curling)

- ▶ Last week you spent some time designing a building that Dorothy might see in the Emerald City.
- ▶ Normally in Year 1 we spend a whole day making the buildings we have designed so choose a day to get creative!

Today we are going to make your building using anything you would like! Cardboard boxes, plastic boxes string, glue, tape, etc.

Think carefully about how you construct (build) your creation. Have a look at this picture for some useful ways to attach parts of your model.

If something isn't working then try and think of a different way of doing it.

Do you need to measure something?  
Do you need to cut or tear your materials?

Will glue work or do you need tape?

- ▶ Everything in the Emerald City is green so try and make your building as green as possible!
- ▶ You can use paint, paper, card, pens, glitter, anything you want!
