# Materials

LO: To describe the simple physical properties of materials Compare and group together a variety of everyday materials on the basis of their physical properties.

#### What is a material?

- Last week, we discovered that materials are the matter or substance that objects are made from.
- · We use a wide range of different materials every day.

What examples did we think of?

### Properties of Materials

- · Today, we are going to think about how we can describe those materials by thinking about their **properties**.
- https://www.youtube.com/watch/x0Kr462HLc 0

# Why is it made from that?

• Objects are made from different materials because of the different things they can do. Think about what the following items are made from and why.

### Vocabulary

Here are some words that help us to describe properties. Discuss with an adult what these words mean......

#### Properties of materials

stretchy

shiny

stiff

dull

flexible

absorbent 🕜

smooth

brittle

not absorbent waterproof leaky transparent opaque strong \*\*
weak

Extend Page

#### Challenge

Can you find objects around the house or classroom that have these properties?

Do any of these objects have more than one of these properties?

### Wizard of Oz

· How could we describe the properties of these objects and characters from our story?

## Independent Task

 Cut out the pictures and stick or draw them in your exercise book.

• Label the physical properties that these objects have using the words on the slide to help you.

strong

hard
