

Science

*Can you guess what our Science topic is
this half term?*

*This term our science topic is:
Rocks and Soils*

L.O: To ask relevant questions (working scientifically)

Steps to success:

I can write down what I know about rocks.

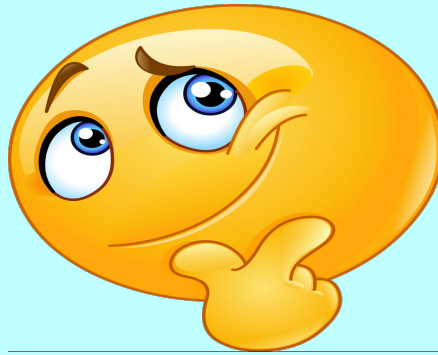

I can raise questions about rocks.

I can identify different words to describe rocks.

*What do you know about rocks and
soils already?*

What do you want to know?

Task 1

Write down anything you know about rocks and soils in this section

What I know about rocks and soils

ROCKS AND SOILS

Write down anything you want to know about rocks and soils in this section

What I want to know about rocks and soils

Remember to punctuate any questions with a question mark

?

Rocks

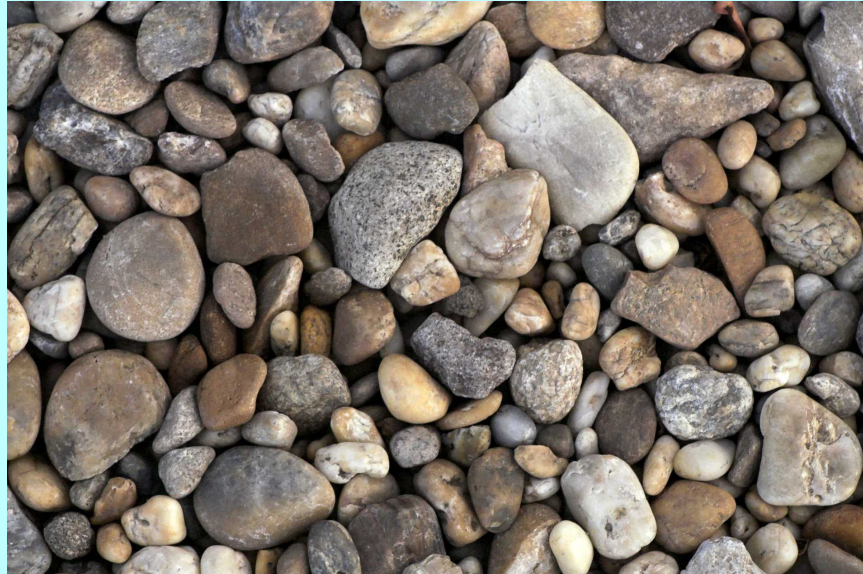

*The effect of
weather on rocks*

Task 2

If you can find any rocks in your garden or outside, look closely at them and think of words you can use to describe them.

Which of these words do not describe rocks?

smooth

transparent

jagged

shiny

dull

hard

crystallised

scaly

dusty

fluffy

bumpy

stringy

rough

feathered

cold

Which of these words do not describe rocks?
