

Alicia Garza Patrisse Cullors Opal Tometi

- These 3 women live in the USA.
- In 2013 they created the Black Lives Matter movement (BLM).
- You might have heard that phrase a lot recently but do you know what it means?

Black Lives Matter

- For many years Black people have been treated badly mainly because of the colour of their skin. These women want that to stop.
- Their aim is to stop racism and create a safe space for Black communities.
- They support Black people by raising money, organising help for those in need and organising events to spread their message.
- This is a great resource if you would like to discuss BLM more with your child:

Marcus Rashford

- Marcus Rashford is an English football player.
- He was born in Manchester and lived with his mum, 2 brothers and 2 sisters.
- Lots of people find him inspirational because he plays football but last year he was known for another reason.
- Read the next slide to find out why...

Free school meals

- You might take a packed lunch to school or you might have a school lunch. Your grown up might pay for your food.
- Some children get free lunches from school.
- In March last year children were not allowed to come to school.
- When the schools closed these children stopped getting their lunches. At home, they might not have had much food.
- Marcus Rashford asked the government to still give free food to children who might not have much at home.

Greta Thunberg

- Greta Thunberg is 18 years old and lives in Sweden.
- Greta tells people about global warming. She wants to stop it.
- Global warming is when the world gets hotter. This might sound like a good thing, however...

Global warming

- ...this will mean that

sea levels get higher

weather gets extreme

animals do not have a home

- To try and slow down global warming Greta does not eat meat, she does not fly on planes and she teaches others about global warming.

Alexander Graham Bell

- Alexander was born in 1847 in Scotland.
- As a child Alexander was very curious and loved problem solving.
- After inventing a mechanical man and experimenting with sound, in 1876 Alexander eventually invented...

The telephone

... the telephone!

- Over the years the telephone has become more and more important.
- Alexander received many awards, medals and honours for his invention.
- As his wealth grew, he used some of his money to set up laboratories and funds to help other scientists and young people.
