

Tim Peake

British Astronaut

Major Tim Peake became the first British astronaut in space for over 20 years when he blasted off for the International Space Station on 15th December 2015. He travelled in a Russian Soyuz rocket launched from Kazakhstan.

When he applied to be an astronaut he was selected from 8000 applicants. As part of his training he has learnt Russian, spent 12 days under the sea and completed a winter survival mission.

Major Peake lived aboard the International Space Station for 6 months conducting experiments in microgravity and maintaining links with schools and children on Earth.

He used the gym on-board to ensure his muscles stayed strong.

The International Space Station (ISS) is the size of a football field. It travels at a speed of 17 500 miles per hour at a height of 240 miles above Earth and completes an orbit every 90 minutes!

Major Peake returned to Earth on the 18th June 2016 via a Soyuz capsule which reached speeds of up to 28000 kilometres per hour or 25 times the speed of sound! The Soyuz capsule made a bumpy touchdown as a result of high winds affecting the region of Kazakhstan where the landing site was.

Major Peake's first impression of Earth was that the smells were really strong. Astronauts go through a period of readjustment when they return to Earth as their bodies get used to withstanding the full effects of Earth's gravity once again. Major Peake admitted to feeling 'terrible' shortly after his landing but quickly began to feel better.

Tim Peake's Mission in Numbers

186 - Days in Space.

10 - The ISS moves 10 times faster than the speed of a bullet.

2800 - Approximate number of orbits of the Earth made.

114,240,000 - Approximate number of kilometres travelled by Tim Peake during his time aboard the International Space Station.

5cm - Temporarily, Major Peake could be up to 5 centimetres taller than he was when he left Earth!

1 - Number of times Tim Peake dialled the wrong number from space and asked "Is that Planet Earth?"

Main Task

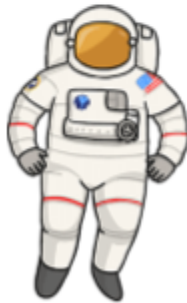

LO: To learn about significant individuals.

24.1.22

Cut and stick the timeline of Tim Peake's life in chronological order.

1972	1990	2008	2009	2015	2016

What qualities do you think that an astronaut would need in order to be successful? Label the astronaut with these qualities.

Write an application as if you are Tim Peake, applying for the job of being an astronaut. What experience do you think he could talk about that would suggest he would be a good astronaut?

Dear Sir/Madam,

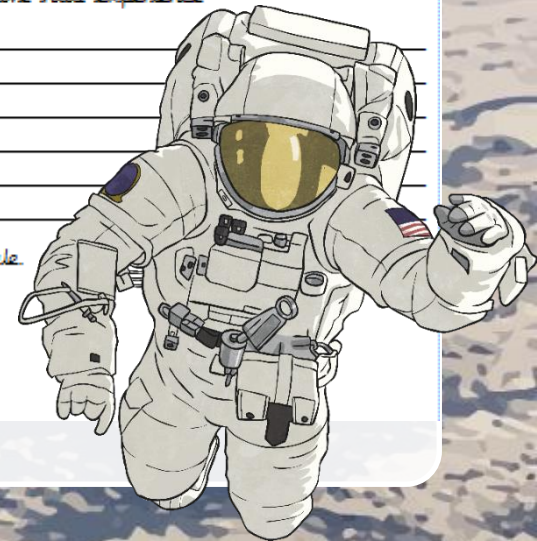

I am applying for the role of an astronaut because

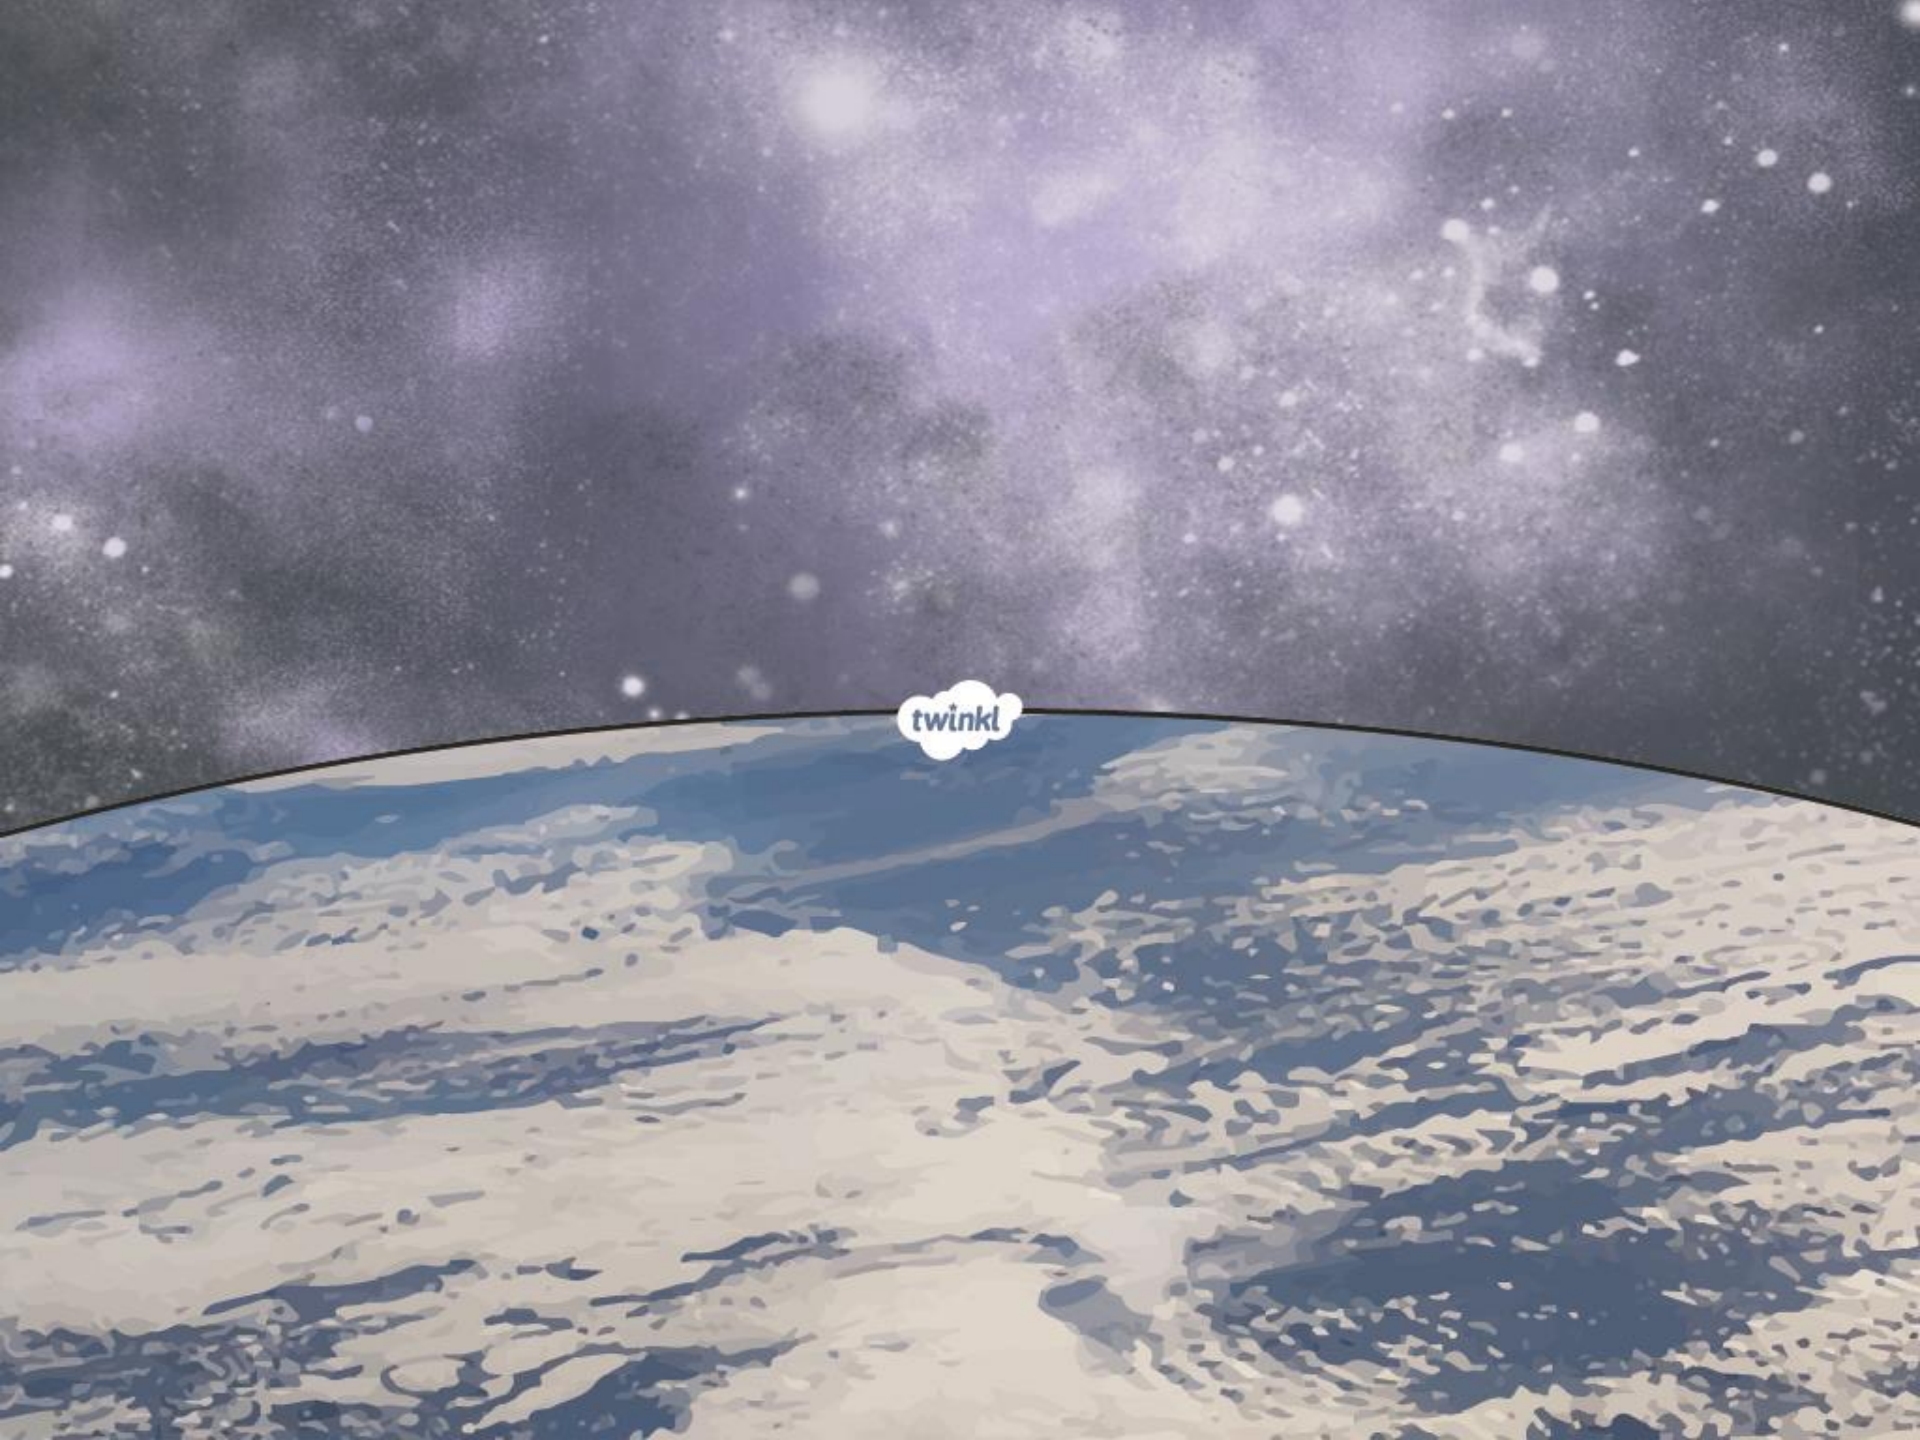

I think I would be perfect for the role as I have had experience

I very much hope to be considered for this role.
