Q20.

Award **TWO** marks for the correct answer of 22,572

If the answer is incorrect, award **ONE** mark for a formal method of long multiplication with no more than **ONE** arithmetic error, e.g.

$$\begin{array}{r} \cdot \\ \times \quad 836 \\ \quad \underline{27} \\ \quad 5852 \\ \underline{16720} \\ 22602 \text{ (error)} \end{array}$$

OR

$$\begin{array}{r} \cdot \\ \times \quad 836 \\ \quad \underline{27} \\ \quad 5612 \text{ (error)} \\ \underline{16720} \\ 22332 \end{array}$$

*Working must be carried through to reach a final answer for the award of **ONE** mark.*

***Do not** award any marks if the error is in the place value, e.g. the omission of the zero when multiplying by tens:*

$$\begin{array}{r} \cdot \\ \times \quad 836 \\ \quad \underline{27} \\ \quad 5852 \\ \underline{1672} \text{ (place value error)} \\ 7524 \end{array}$$
